DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a gas mixture comprising in combination: between about 40 % and about 80 % CO₂, between about 10 % and about 50 % H₂O and between about 10 % and about 30 % O₂, classified in class 252, subclass 373.
 - II. Claims 8-19, drawn to a gas mixture comprising in combination a reactant portion and a diluent portion, classified in class 252, subclass 372.
 - III. Claims 20-23, drawn to a gas mixture comprising in combination molecular gaseous O₂, gaseous CO₂ and water vapor, classified in class 252, subclass 373.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects, since the composition of Claim 8 does not require the presence of the components of claim 1 (O₂, CO₂, and water).
3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects, since the composition of Group II does not require the presence of the components of claim 1 (O₂, CO₂, and water) in the claimed concentration ranges.

Art Unit: 1754

4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. In the instant case the different inventions have different effects, since the composition of Claim 8 does not require the presence of the components of claim 20 (O₂, CO₂, and water).

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II; the search required for Group I is not required for Group III; and the search required for Group II is not required for Group III restriction for examination purposes as indicated is proper.

6. A telephone call was made to Bradley P. Heisler on 8/1/03 and 8/5/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
